Transportation, Air Quality, and Health Symposium

Mark Your Calendars for a one-of-a-kind symposium discussing interdisciplinary research, policy, and emerging issues and technologies at the intersection of transportation and health. Focusing on air quality, emissions, human exposure and energy topics, the symposium will also speak to the broader transportation and health landscape and provide a unique forum for learning and dialogue for a wide range of stakeholders.

The agenda includes:

- Energizing keynote addresses
- Plenary and breakout technical sessions
- Practitioner-led roundtables
- Poster sessions
- Networking and social events
- Tour of the Clean Transportation Research Complex
